Committed to innovative PVD: LIFETIME LIMITED WARRANTY

COSMIC once again shows its commitment to innovation by increasing its collection of BATH LIFE bathroom accessories with **two new PVD finishes: Nickel and Gold.**

PVD (Physical Vapour Deposition) is a vacuum recoating process, in which the recoating material is vaporised and transported through a vacuum to form a molecular union with the previously polished and chrome plated base. This treatment, as well as being a more ecological production process than others due to its low consumption of electrical energy, offers greater resistance to corrosion and abrasion than any other finish, giving it an unalterable finish that is much easier to clean and does not need special care.

To guarantee this resistance, COSMIC is offering a **Lifetime Limited Warranty** under which COSMIC will repair or exchange any piece of the collection that suffers damage to its finish.

These two new finishes adorn bathroom suites with the exclusiveness and distinction of nickel and gold, and which, with the durability of these pieces and their perfectly straight lined and angled design make this collection the ultimate combination of design and quality.

THE NEW COSMIC CATALOGUE: An endless source of ideas

COSMIC launches its new catalogue filled with modern avant-garde atmospheres that bring out the innovative design and functionality of the brand's products. This proposal is all part of a renewed image, purer and more neutral, with a lighter logo, using white as its corporate colour. The catalogue is split into three sections and takes us on a journey through the yesterday and today of COSMIC, its creators and the most significant awards received. Next, to submerge us into the Bathroom Experiences, **more than 30 offers of environments** that are an extension of the demanding and innovative personality of today's consumer. Lastly, organised into families, we find **one of the most global and attractive offers** on the market, washbasins and fixtures, taps, accessories, mirrors, lighting and textiles; accompanied by photographs and 2D drawings, descriptions and references. Its vast product variety also includes latest trends presented at ISH and Construmat 07, the collection of Block furniture, Compact washbasins, Project accessories and Bi & Drop worktop accessories. The COSMIC catalogue offers its customers a single volume full of information, providing an endless source of ideas for decorating any kind of bathroom.

Awards

SIMPLEX awarded with the Delta de Plata 2007

Last November 8th COSMIC was awarded with the **Delta de Plata 2007** for its **Simplex collection**, designed by Martín Ruiz de Azúa and Gerard Moliné, in the 32nd edition of the Delta ADI-FAD awards of Industrial design. It was the first time that these awards gathered a total of 237 international projects.

Nomination to the DESIGN MANAGEMENT EUROPE awards

COSMIC who makes design one of its key ingredients in developing business strategy, has received a nomination for the **Design Management Europe Award**. This award is granted to the companies which give design a great part in their management, policy and strategy. It is promoted by the **BCD** (Barcelona Design Centre) company promoting centre. This centre is framed in the European project Design Management Europe whose aim is to show and promote the commercial benefits of a good design management.
